

COVID 19

Whilst we are aware that COVID 19 is still out there, we are continuing to follow government guidelines to get our business back to normal as safely as we can:

We will continue to

- * Ensure good hygiene for everyone
- * Maintain appropriate cleaning regimes using standard products
- * Keep occupied spaces well ventilated
- * Follow public health advice on testing, self isolation and managing confirmed cases of COVID 19 - Current self isolation guidance being - **While you're no longer legally required to self-isolate if you have COVID-19, you should try to stay at home and away from others to avoid passing on the virus.**

Children and young people aged 18 years and under who have a positive test result

It is not recommended that children and young people are tested for COVID-19 unless directed to by a health professional. If a child or young person has a positive COVID-19 test result they should try to stay at home and avoid contact with other people for 3 days after the day they took the test, if they can. After 3 days, if they feel well and do not have a high temperature, the risk of passing the infection on to others is much lower. This is because children and young people tend to be infectious to other people for less time than adults.

Children and young people who usually go to school, college or childcare and who live with someone who has a positive COVID-19 test result should continue to attend as normal.
